Xanagisawa Wind Instruments Since-1972

Model 265CH

Bb Fanfare Trumpet
3piston valves

Lacquered or silver plated body
on request

All "YAMAHA" brass instruments are built with special quality alloys to produce the highest standard or sonority and sound. "YAMAHA" brass instruments are constructed using traditional methods to guarantee a homogeneous body structure that determines the maximum strength and the pure sound, unlike instruments build using the "blown soft tube" method. All brass instruments are cleaned and polished by traditional processes and not by the "electrochemical" system which only damages and deteriorates the quality of their body.
